# ERS

## Cancer Program Management & Analytics

With more than 30 years of proven results in cancer registry solutions, ERS is positioned at the forefront of providing cancer programs nationwide with a valuable foundation of data and insights that provide for the best cancer care for every patient.

As the industry's first true cloud-based offering with innovative abstracting and case-finding capabilities, CRStar empowers both individual cancer centers and large enterprise health systems to achieve their full potential by meeting and exceeding increasing regulatory, accreditation and quality reporting requirements while also providing insights for enhancing cancer program management.

Visit our website [www.mycrstar.com](http://www.mycrstar.com) to see how our registry application, CRStar, can help you leverage your registry data to become more productive and grow your oncology program.
